

## Myology Institute Seminar Series Fall 2017 Schedule

Date	Speaker	Title
August 24	Terence Partridge Ph.D FMedSci, Center for Genetic Medicine Research ,Children's National Medical Center	Analysis of the dynamics of myogenic growth and regeneration in the mdx dystrophy on different genetic backgrounds
September 7	Marie Rivera-Zengotita, M.D. Clinical Assistant Professor Department of Pathology, Immunology and Laboratory Medicine UF Health College of Medicine	Skeletal muscle biopsy: Using histology to guide molecular investigations
September 21	Donovan J. Lott, PT, PhD, CSCS Research Assistant Professor Department of Physical Therapy University of Florida	Safety & Feasibility of a Strength Training Protocol in Duchenne Muscular Dystrophy
October 5	April Pyle, PhD Associate Professor, Microbiology, Immunology & Molecular Genetics University of California, Los Angeles	Emerging Approaches for Duchenne Muscular Dystrophy using Human Pluripotent Stem Cells
October 19	Maurice S. Swanson, Ph.D. Professor; Department of Molecular Genetics and Microbiology and the Genetics Institute University of Florida, College of Medicine	Disrupting the transcriptome in congenital muscular dystrophy
November 2	Alan H. Beggs, PhD Sir Edwin and Lady Manton Professor of Pediatrics Harvard Medical School Director, The Manton Center for Orphan Disease Research Division of Genetics & Genomics Boston Children's Hospital	Molecular genetics and therapies for congenital myopathies
December 7	James Papizan, PhD Postdoctoral Fellow Department of Molecular Biology University of Texas-Southwestern Medical Center	Cullin-3 and Kelch-like proteins in striated muscle proteostasis
