Institute

UNIVERSITY of FLORIDA

Myology Institute Seminar Series Spring 2021 Schedule

Date	Speaker	Title
January 21	Lan Wei-LaPierre, PhD Assistant Professor; Department of Applied Physiology and Kinesiology University of Florida	Mitochondrial Calcium Uptake, a potential new therapeutic target for Amyotrophic Lateral Sclerosis
February 4	Jill A. Rafael-Fortney, PhD Professor; Department of Physiology & Cell Biology The Ohio State University	Mineralocorticoid Signaling and Inflammation in Acute Muscle Injury and Muscular Dystrophy.
February 18	Liam Hunt, PhD Postdoctoral Researcher; Developmental Neurobiology St. Jude Children's Research Hospital	Combining Drosophila genetic screening and mouse genetic models to uncover evolutionary conserved regulators of skeletal muscle growth, wasting, aging and proteostasis
March 4	Josiane L. Broussard, PhD Assistant Professor; Department of Health and Exercise Science Colorado State University	Impact of sleep and circadian disruption on metabolic health
March 18	NMPT Symposium 3/19/21: Rachelle Crosbie, PhD Professor; Department of Integrative Biology & Physiology University of California, Los Angeles	Regulating Myofiber Connection to the Extracellular Matrix in Health and Disease
April 1	Abigail Mackey, PhD Associate Professor; Department of Biomedical Sciences University of Copenhagen	Cell and tissue junctions of skeletal muscle fibres
May 6	Alessandra Norris BMS Graduate Student; Daniel Kopinke Lab Department of Pharmacology and Therapeutics University of Florida	The Path(way) to Controlling Intramuscular Fat
May 20	Karyn Esser, Ph.D. Professor; Department of Physiology and Functional Genomics University of Florida	Exercise training; MoTrPAC preclinical studies first multi-omic reveal
