

Myology Institute Seminar Series Spring 2022 Schedule

Date	Speaker	Title
February 3	Bradley Gordon Ph.D. Assistant Professor Nutrition and Integrative Physiology Florida State University	Androgen regulation of limb muscle mass: mechanisms beyond the androgen receptor
February 17	Andrea Bonetto, Ph.D. Associate Professor; Department of Surgery Indiana University School of Medicine	Tumor- and host-derived factors drive musculoskeletal complications in cancer cachexia
February 22	Elizabeth Sefton, Ph.D. Post Doctoral Associate University of Utah	The essential role of connective tissue in muscle development and disease.
March 3	Coen Ottenheijm, Ph.D. Professor; Department of Physiology Amsterdam UMC	Sarcomere structure and function in nemaline myopathy: a developing story
March 18	Please attend the NMPT Symposium	
April 7	DeWayne Townsend, DVM, Ph.D. Associate Professor, Integrative Biology and Physiology University of Minnesota	Energetics of the dystrophic heart
April 21	Lauren Sparks, Ph.D. Associate Investigator Translational Research Institute at AdventHealth	Comprehensive interrogation of human skeletal muscle reveals a dissociation between insulin resistance and mitochondrial capacity
May 5	Glenn Walter Professor; Department of Physiology and Functional Genomics University of Florida	Magnetic Resonance Biomarker Discovery for the Muscular Dystrophies
